

the MAC BEAM SYSTEM
for Pain Management

A Painless, Noninvasive, Non-Toxic, Surgery Free System.

Harnessing the power of Bio Energy,
the Mac Beam System for Pain Management
is the result of 20 years of testing, research
and quality patient care.

*“Providing those in pain and recovery,
the opportunity to lead healthy lives.”*

Enlightening the World

How Does the Mac Beam System Work?

Mr. Mac, founder of the Mac Beam System, combined his training in laser physics and biomedical science with his knowledge of oriental medicine, Mr. Mac developed a series of treatment methods and devices based on low level laser energy through electrical and photostimulation — a process he calls “bio energy.” Applying this innovative technology, the system treats conditions as minor as chronic arthritis aches and pains to as severe as leprosy and paralysis.

The Mac Beam System promotes the healing process by increasing the body’s natural ability to heal existing conditions, matrix remodeling, inflammation reduction and immune regulation.

The Mac System also increases both blood supply and circulation while relieving acute and chronic pain — *one of the most useful applications of our system.*

Applications:

- General Pain (Muscle-skeletal, Trigger Points, Spinal Pain)
- Helps Ulcer and Tissue Injuries
- Bone Spur, Nerve Irrigation, Tendonitis, Bursitis, Myositis, RA, Frozen Shoulder, Carpal Tunnel Syndrome, Sciatica
- Promotes Healing Process
 - Anti-Inflammation
 - Proliferation (Re-epithelialisation and Contraction)
 - Matrix Remodeling (Improves Quality of Scarring)
- Stimulates Production of Collagen (repair and replace old tissues)
- Increase Microcirculation and Higher Rate of ATP Synthesis (better tissue oxygenation and nutrition)
- Helps to treat Skin Wounds, Bed Sores, Burns
- Helps to treat Acute Wounds (Injuries / Post-operative)
- Diabetic Foot Ulcer, Gangrene, Chronic Leg Ulcer

“It is at the heart of every medical practitioner's mission, that he be able to provide his patients with the care and healing powers that his palms may possess.”

Innovative Design and Simple Operation

- Quality Control with 3 Levels of Software Management Programs
- Flexible and Sophisticated Operative Capabilities (256 Different Frequencies)
- Clinically Proven Combination of Multiple Wavelengths (632nm - 940nm)
- Fully Automated / One-touch Operation
- Automatic Shut-off for Safety
- Pre-set Databanks Offer Rapid Access and Selection
- Lightweight and Portable (12 x 8 x 4 inches)

Safe, effective and economical, the Mac Beam System is manufactured in conjunction with one of the world leaders in medical equipment by implementing cutting-edge technologies and high quality standards used in life-saving anesthesia ventilators and stereotaxic computers for brain surgery.
